180 DAYS Challenge

DAY 1:

DAY 2:

Button

HyperLink! The HTML `<a>` tag defines a hyperlink.

`<a href = "url">Link text </a>`

attributes of Target Attribute of HyperLink

**Target:** By default, the linked page will displayed in the current browser window. To change this, you must specify another target for the link.

Value of Target Attribute

- **`_self`** - Default. Opens the document in the same window/tab as it was clicked.
- **`_blank`** - Opens the document in a new window.
- **`_parent`** - Open in parent frame.
- **`_top`** - In the full body of the window.

Using target Attribute

`<a href = "path or url of file" target = "_blank">  
Link text </a>`

</DOCTYPE html>

Tells your browser that it's an HTML vs doc

<html lang="en">

{ Defining }  
{ Defining }

# Step to ignore file

- Step 1: Create file to name is `<.gitignore>`
- Step 2: In `.gitignore` file put file name or file format or Path or Path + format

## Branching, tagging, Merging

End Date: 07/07/2023  
(1 week)

Normal days

8:00 AM to 11:00 AM

Exam Study (Next Exam)

11:00 AM to 12:00 PM

~~Exam~~ Extra Work

12:00 to 02:00 PM

Work on Profile's

02:00 to 06:00 PM (if not a Exam)

180 days Challenge (Watching Vidco &  
Creating Note)

06:00 to 08:30 PM

Extra Work

08:30 to 10:00 (depend on situation)

Exam Study or 180 days Challenge

~~Or~~

10:00 to 11:30 PM (if He is Agree)

Gaming with friends

Or Continue Study or  
Challenge

## Git & GitHub

- What is Version Control?

Version Control is the practice of tracking and managing changes to Software Code. Version Control Systems are Software tools that help Software teams manage changes to source code over time.

- Make Save points that save your project
  - Provides total development freedom.
- Ex: Git, Subversion, Perforce.

### Download & install Git

- What is Git

Ans: Git is a Version Control System.

It's a method to save the history of your files, also changes made in it and Git achieves multiple things through it.

### Setup Git (Download & install)

Step 1:) Go to official website of Git and Download.

Step 2:) After Download Then install with Default Settings check next again & again.

Step 3:) Open CMD and write `git`  
`git --version` to checkout.
